

PANORAMA

PLANT-WIDE QUALITY VISION.

From machine-level inspection to plant-level understanding.

PANORAMA is SACMI's centralized plant-wide dashboard that connects multiple CVS vision systems into a single, real-time view of production.

By collecting and organizing inspection data from different machines and production lines, PANORAMA helps operators, quality managers and production managers monitor performance, identify trends, analyze rejects and alarms, and make faster, data-driven decisions.

REMOTE PLANT-WIDE VISIBILITY

Monitor all connected CVS systems from one centralized dashboard.

REMOTE ACCESS TO CVS SYSTEM

Open CVS WEB and Remote Desktop directly from PANORAMA.

PANORAMA

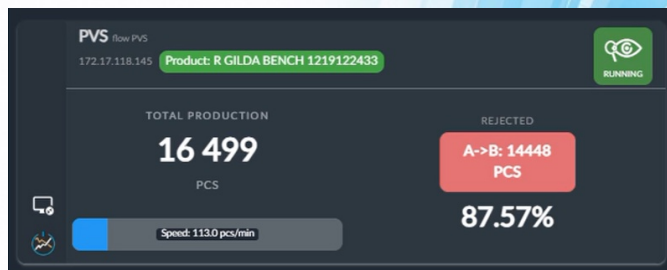

PLANT-WIDE QUALITY VISION.

PANORAMA connects all CVS systems in the plant and turns separate machine data into a single, real-time view.

1.

TILES OVERVIEW

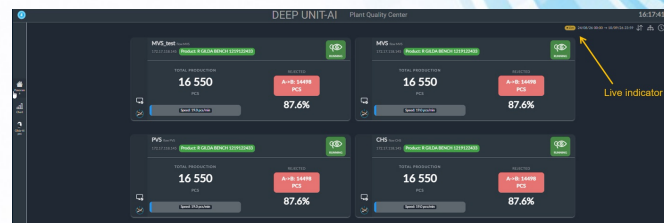

Each connected CVS system is represented by a tile displaying the most important production information, including machine status, active inspection recipe, production counters, rejects and speed.

2.

REAL-TIME MONITORING

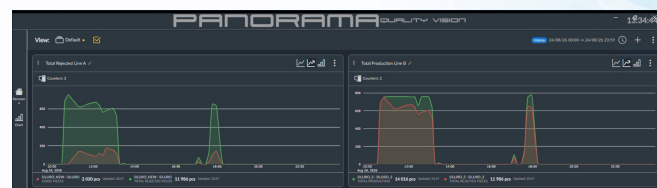

Monitor production, rejects, alarms and machine conditions as they happen. The LIVE view provides an instant overview of the entire installation, helping users react quickly to emerging issues.

3.

HISTORICAL ANALYSIS

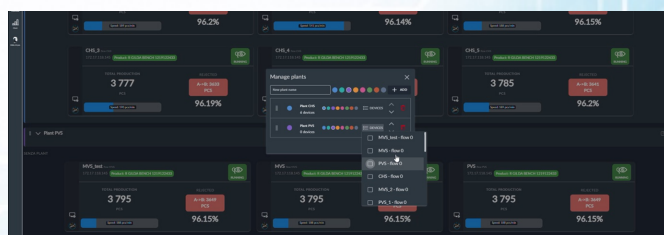

Switch from LIVE to HISTORY mode and review data from previous shifts, production runs or custom time periods. Analyze trends, compare performance and investigate events that affected production quality.

4.

CUSTOM DASHBOARDS

Choose the information that matters most to you. Multiple charts and widgets can be arranged to create dashboards tailored to different needs.

5.

REMOTE DESKTOP + CVS WEB INTEGRATION

Access CVS Web directly Open CVS WEB for detailed data analysis or connect via Remote Desktop to access the machine interface directly from PANORAMA.
